## WORK EXPERIENCE

### BNY — Chennai, India

**Software Developer (SDE)** — Jul 2024 –Present

- Orchestrated RESTful API development using Spring Boot and Java, accelerating data retrieval speed by 30% and enabling real-time content delivery to over 2,000 concurrent users.
- Analyzed and streamlined modular microservices, reducing system downtime by 20% and improving application scalability.
- Led the initiative to implement unit and integration tests using Mockito, achieving 85% test coverage and reducing production defects by 25%.
- Enhanced system stability by resolving vulnerabilities and bugs, achieving zero critical security incidents post-release.
- Built responsive frontend screens using Angular, implementing server-side pagination that reduced data load by 40% and ensured a smooth user experience.

### BNY — Chennai, India

**Software Developer Winter Intern** — Jan 2024 – Jun 2024

- Revolutionized API performance by refactoring legacy code and optimizing data retrieval strategies, slashing API response time by 25% and handling 8,000+ API requests daily, contributing to stable content delivery.
- Streamlined CI/CD pipelines, Docker-based deployments, and unit testing with JUnit & Mockito, achieving 90% test coverage and significantly enhancing release stability.
- Optimized microservices architecture to improve system scalability and reduce service latency by 20%, enhancing overall application performance.

### BNY — Chennai, India

**Software Developer Summer Intern** — Jun 2023 – Jul 2023

- Planned and developed RESTful APIs using Spring Boot, seamlessly integrating them with Angular to enable real-time data updates and improve page responsiveness by 25%.
- Strengthened application security and stability by identifying and resolving critical bugs and vulnerabilities, reducing security issues by 30% and improving overall code quality.

## Technical Skills

Language and Frameworks: Java, Spring-boots, Angular, C++, Typescript.

Testing & Tools: Mockito, JUnit, Git, GitHub, GitLab, Postman,Insomnia, Splunk.

Other Skills: Data Structures & Algorithms, DBMS, Software Development Lifecycle, Agile environment (Agile-Scrum), Microservices, Object-Oriented Programming, Restful APIs, Design Patterns, Design Principles, Oracle DB, Distributed Systems, NoSQL Databases, Debugging, Multithreading, Scheduling, Relational databases, API Design, CI/CD Pipelines, Docker, Spring AI, Maven.

## Projects

### Report Center — Jan 2024 – Jan 2025

- Engineered a high-performance full-stack reporting platform with Angular, Spring Boot, and Oracle DB, efficiently serving 100K+ active users and processing over 20 million API requests monthly.
- Delivered a responsive Angular frontend featuring efficient data rendering and pagination, maintaining smooth performance under heavy traffic and boosting user engagement and load times by 35%.
- Instituted robust data validation and error-handling mechanisms across trading reports, slashing data discrepancies by 95% and greatly enhancing accuracy and trust. Implemented scheduled and on-demand report generation with automated data retention and cleanup, reducing storage usage by 30% and improving maintainability.

### Run Report — Jan 2025 – Jan 2026

- Designed and developed a scalable Micro-Frontend (Angular) for dynamic report generation, enabling users to filter by time period, portfolio, and account; improved report accessibility by 40%.
- Built end-to-end full-stack features (Angular + Spring + Java + REST) integrating frontend workflows with backend services to enable real-time report rendering with PDF/CSV export, reducing report generation time by 35%.
- Elevated data security protocols by implementing JWT token based authentication for Advisor and Investor dashboards and configured 10+ unique role permissions to ensure data access was strictly controlled.

## Education

### The LNM Institute of Information Technology — Aug 2020 -May 2024

Bachelor of Technology in Computer Science (CSE) | GPA: **7.48** / 10
