Summary

B.Tech graduate in Computer Science with strong expertise in Java, Spring Boot, and Angular, building scalable and high-performance web applications. Experienced in RESTful APIs, microservices, and responsive Angular frontends integrated with backend systems. Hands-on experience with JUnit/Mockito, CI/CD pipelines, and Docker, with a focus on reliability, performance, and clean, production-ready code.

WORK EXPERIENCE

BNY — Chennai, India
Software Developer (SDE) — 07/2024 - Present

- Designed and implemented RESTful APIs, improving data retrieval speed by 30%, enabling real-time content delivery.
- Built and streamlined modular microservices, reducing system downtime by 20% and improving application scalability.
- Led the initiative to implement unit and integration tests using Mockito, achieving 85% test coverage and reducing production defects by 25%.
- Enhanced system stability by resolving vulnerabilities and bugs, achieving zero critical security incidents post-release.
- Built responsive frontend screens using Angular, implementing server-side pagination that reduced data load by 40% and ensured a smooth user experience.

BNY — Chennai, India
Software Developer Winter Intern — 01/2024 - 06/2024

- Engineered scalable RESTful APIs using Spring Boot, reducing API response time by 25% and enabling efficient dynamic content delivery.
- Streamlined CI/CD pipelines, Docker-based deployments, and unit testing with JUnit & Mockito, achieving 90% test coverage and significantly enhancing release stability.
- Optimized microservices architecture to improve system scalability and reduce service latency by 20%, enhancing overall application performance.

BNY — Chennai, India
Software Developer Summer Intern — 06/2023 - 07/2023

- Designed and developed RESTful APIs using Spring Boot, seamlessly integrating them with Angular to enable real-time data updates and improve page responsiveness by 25%.
- Strengthened application security and stability by identifying and resolving critical bugs and vulnerabilities, reducing security issues by 30% and improving overall code quality.

Technical Skills

Language and Frameworks: Java, Spring-boots, Angular, C++.

Testing & Tools: Mockito, JUnit, Git, GitHub, GitLab, Postman, Insomnia.

DevOps & Deployment: CI/CD Pipelines, Docker.

Other Skills: Data Structures & Algorithms, DBMS, Operating Systems, Software Development Lifecycle, Agile environment, Microservices, Object-Oriented Programming, Restful APIs, Design Patterns, Design Principles, Oracle DB, Distributed Systems, NoSQL Databases, Debugging.

Projects

Report Center — 01/2024 - 01/2025

- Engineered a high-performance full-stack reporting platform with Angular, Spring Boot, and Oracle DB, efficiently serving 100K+ active users and processing over 20 million API requests monthly.
- Delivered a responsive Angular frontend featuring efficient data rendering and pagination, maintaining smooth performance under heavy traffic and boosting user engagement and load times by 35%.
- Instituted robust data validation and error-handling mechanisms across trading reports, slashing data discrepancies by 95% and greatly enhancing accuracy and trust.
- Implemented scheduled and on-demand report generation with automated data retention and cleanup, reducing storage usage by 30% and improving maintainability.

Education

The LNM Institute of Information Technology — 08/2020 - 05/2024
Bachelor of Technology in Computer Science (CSE) | GPA: **7.48** / 10
